# Women in Engineering Apprenticeship Insight Experience

January & February 2026

This apprenticeship insight event introduces BAE Systems, engineering and our early careers programmes. This is a hybrid event delivered over four sessions, with two sessions online and two sessions on-site at various locations across the UK.

You'll have an opportunity to learn more about us, gain hands on experience and visit our sites. There will also be opportunities to meet our current engineering apprentices, who will provide insights into their role and share their experience.

As part of the insight experience, you will interview for one of our engineering apprenticeships and could be offered a full-time position.

Applications close 10 November 2025.

Applications may close early if sufficient applications are received.
